

4,6mm x 30

DM31 AP

Article No. 231001

The DM 31 AP is a hard hitting, armour piercing round for PDW weapon systems. It defeats the NATO CRISAT target at distances up to 200m making it a superior choice compared to the standard 9mm ammunition. The solid steel bullet is coated to reduce barrel wear and to enhance ballistic performance.

- high perforation capability
- same POI as ball cartridge
- battle-proven

Classification

Purpose	Hard targets
Qualification/certification	–
Standards	Complies to BW-requirements
Environm. impact	Standard

Technical data

Caliber	4,6mm x 30
Cartridge weight	7.3g
Bullet type	Solid
Bullet material	Plated steel
Bullet weight	2.0g
Case material	Brass
Powder charge	0.56g
Primer	Boxer
Temperature range	-54°C to +52°C

Ballistic data

Gas pressure	≤ 400Mpa (BWB)
Velocity	670m/s at 10m
Bullet energy	490J at 10m
Precision	Sa < 35mm at 100m
